* Note for R1 - R8

The board can handle up to 500mA per channel. Changing the resistor has impact on Iled max which is calculated $0.1 / R$.

With 0.36Ω , it's $0.1 / 0.36 = 278\text{mA}$ (measured 290mA)

Smallest recommended resistor is 0.22Ω which will end up in Iled max per channel little more than 450mA
